

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THE EXERCISES in this Manual are to be transferred by the grade teacher to the blackboard staves and written in the usual musical notation; that is, pupils are from the first to see notes only, and the teacher alone makes use of the Manual. The figures represent notes, as:

1	or 8	is	do.
2		is	re.
3		is	mi.
4		is	fa.
5		is	sol.
6		is	la.
7		is	si.

The kind of a note to be written, as quarter-note, half-note, etc., is indicated by an exponent or superior figure, as:

1	is	a	quarter-note.
1 ²	is	a	half-note.
1 ³	is	a	dotted half-note.
1 ⁴	is	a	whole-note.

It must be understood that these exponents have the same significance on each of the nine figures, and also on zero when used as a sign for a rest.

If an eighth-note be taken as the unit of time measurement; that is, as a beat-note the values will be:

- 1 is an eighth-note.
- 1² is a quarter-note.
- 1³ is a dotted quarter-note.
- 1⁴ is a half-note,

and if a half-note be taken as a beat-note the values will be:

- 1 is a half-note.
- 1² is a whole-note.
- 1³ is a dotted whole-note.
- 1⁴ is a double whole-note.

Rests are indicated as follows:

- 0 is a quarter-rest.
- 0² is a half-rest.
- 0³ is a dotted half-rest.
- 0⁴ is a whole rest.

When zero is used as a superior figure as 3⁰, 4⁰, etc., the note represented by the figure alone, might be written on either of two degrees of the staff, as, first line or fourth space; but when zero is used as an exponent the lower position is always meant.

A month's work is divided into weeks and the weeks are divided into days. From two to eight melodies are given for each day. As only four days' work are assigned for each week, the remaining day may be used for teaching rote-songs or review, as the supervisor or grade teacher desires. All of the exercises for the day should be written in notes on the blackboard staves before the lesson, so that the entire period may be used for singing. Ten or twelve feet of blackboard staves will, if the notes are written compactly, be sufficient to hold the exercises for any one day. The exercises are in one key for a month, then another key is taken up, and so on for seven months. After this the change from key to key is more frequent. The teacher must from the first exercise place the G clef, upon the

staff, write the proper signature for each key, the proper time-sign, and divide the music into measures. It is very important also that the correct pitch be given for each exercise or melody, but this rule, of course, need not be interpreted too strictly when passing from exercise to exercise during any one day's lesson, provided the children maintain proper pitch. The teacher should guide the pupils with the pointer until they are able to sing the exercises moderately fast, when they may begin to beat time. During their first attempts to beat time while singing, the teacher should continue to help at the board with the pointer, but as they become more independent the class may be left to sing the exercises without the teacher's guidance, except as she beats time and keeps general control of the class.

The first few exercises should be sung to the class. It is new matter, and must be presented and explained. After a little imitation work in which the class have grasped the names of the notes used, as *do's*, *re's*, and *mi's*, explain the principle upon which these notes are combined to make melodies. Put it concretely, as: all notes upon the second line are *do's*, and sound alike; all notes in the second space are *re's*, and also sound alike, and so on. Then let class use their new knowledge in singing a new melody without assistance. Sing every new syllable to them when it first appears in an exercise. It is a new element. Help, teach, encourage and interest them until they develop the power to see, hear and sing correctly, or nearly so. As regards signatures, kind of notes used,—as quarter-notes, half-notes, etc., and the significance of the figures used as time signs, proceed as follows:

FIRST. During the entire year teach no more in regard to signatures than that they indicate the place of *do*; for instance, one sharp means that *do* is on the second line, two sharps that *do* is in the space below the staff or on the fourth line, three sharps that *do* is in the second space, and so on. Do not talk about keys. It is meaningless until the pupils have been taught the letter or pitch names of the lines and spaces.

SECOND. The kinds of notes,—as eighth-note, quarter-note, etc., may be taught to the class from the third month, and the values of the notes, as having one beat, two beats, etc., may be taught when the pupils begin to beat time. The meaning of the figures used as time signs may be then explained. At the start and

for two or three months the class should be held strictly to singing the allotted exercises. No facts which are not of immediate use need be taught them. It is important, however, that they be made at the very outset to grasp the truth that notes on the same line or space are alike in name and sound. That *re* is above *do*, that *mi* is above *re*, and so on. Children should never name notes, but should sing them first, last and all the time.

In many exercises or melodies the same strain, consisting of a certain succession of intervals, is repeated several times. This is done that these intervals may be more thoroughly drilled upon, and so be more rapidly memorized. The exercises are all written in $\frac{2}{4}$, $\frac{3}{4}$, $\frac{4}{4}$, and $\frac{6}{4}$ measures, but, of course, these can be translated into $\frac{2}{8}$, $\frac{3}{8}$, $\frac{4}{8}$ and $\frac{6}{8}$ measure by using the eighth note as the beat-note, or into $\frac{2}{2}$, $\frac{3}{2}$, $\frac{4}{2}$ measure by using the half-note as the beat-note.

The teacher will create interest by varying the monotony of class singing with individual singing, and in letting one-half of the class listen while the other half sing, and *vice versa*; also by letting certain pupils name the exercise or song which they like best.

The exercises are also suitable for dictation purposes. It may be added that the melodies in this Manual are easy and tuneful, and that they have been tested in the schoolroom. Grade teachers have handled the work easily, and their classes have shown an interest in the singing lesson equal certainly to that shown in any other school exercise. The author wishes to acknowledge with thanks the assistance of Mr. Geo. P. Havens in revising the first edition of the Manual, and his further help in contributing the exercises of the eighth and tenth months.

Work is laid out for forty school weeks. An appendix is added giving the musical symbols into which the figures are to be translated, with their names and meaning.

The foregoing directions regarding the use of the various symbols, and upon the teaching of theory, time and rhythm, are not of vital importance. Other Supervisors may proceed differently. The Manual will be valued because it contains a large number (about 1,200) of closely graded melodies that can be used with any method which aims to teach sight-singing, and it is offered to teachers of school music in the hope that it may prove a solution (or one solution, let us say), of the sight-singing problem for beginners.
